

Proflex Touch Screen Glove

Brand: Apollo

Description

Proflex Touch Screen Neoprene Glove (Black)

Apollo's Proflex Touch Screen Glove is made from 2mm neoprene to keep your hands warm. Featuring a conductive thumb, index finger and middle finger for touch screen compatibility, allowing the operator to use devices even when the gloves are wet.

Still holding their super stretch and flexible material, the Apollo Proflex Glove is a practical solution for operators who need to feel and utilise their hands without being restricted by gloves. Great for ropework and other tactical operations.

Suitable for diving, water operations, boat operations, flood rescue and swiftwater rescue operations.

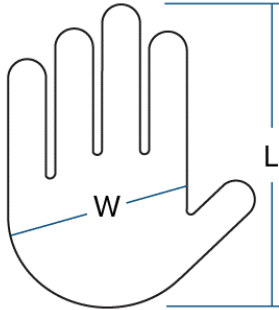

Features:

- 2mm neoprene
- Conductive Thumb, Index Finger & middle finger for use with Touch Screen in cold weather.
- Stitched and glued seams for extra durability and warmth
- Edge binding on cuff
- Super stretch and flexibility
- Popular with divers requiring manual dexterity underwater.
- Black in colour

Usage:

- Defence
- Rescue
- Commercial Diving
- Scuba Diving
